

# Who We Are

**About Us**

# Our Story | From First to Future

For over 30+ years, QuickLogic has been a pioneer in the world of FPGA technology, consistently achieving industry firsts. Innovation is at the heart of everything we do, driving us to push the boundaries and ensure that cutting-edge technology is accessible to everyone.

QuickLogic takes pride in being the first programmable logic company to actively support a fully open-source eFPGA suite of development tools. This commitment to open-source solutions reflects our belief in making technology universally accessible and empowering a global community of innovators. Our journey has been defined by a relentless pursuit of excellence and a passion for enabling the future of intelligent solutions.

Our Values and dedication to Innovation remains our guiding principle as we continue to lead the way in FPGA and eFPGA advancements, creating an atmosphere where technology knows no bounds.

# Our Values | Integrity In Every Action

Driven by Excellence, United by Values, committed to building the future through Collaboration, Respect, Integrity, and Results.

# Our Mission

**Our mission is to serve the underserved markets and enable all innovators to grow and shape the future through open-source technology.**

At QuickLogic, our mission is clear: to serve underserved markets and empower all innovators to grow and shape the future through open-source technology. We provide accessible tools that foster creativity and drive transformation. By championing and advancing open[1]source, we aim to lead the industry towards positive change by fulfilling and meeting diverse technological needs.

# Our Vision

## **Transforming The Programmable Logic Through Open Innovation**

At QuickLogic, our vision is to transform the landscape of programmable logic through open innovation. Dedicated to putting customers first and ensuring high reliability, we lead by pioneering new pathways and revolutionizing the industry with open-source technology. Fostering a culture of collaboration and innovation, we strive to create accessible and groundbreaking solutions that shape the future of programmable logic.

# Our Culture | **One Team, One Vision**

## **Transforming The Programmable Logic Through Open Innovation**

Our company thrives on the principle that shared purpose drives success. 'One Team, One Vision' means that every member of our organization, regardless of role or department, works together as a cohesive team. We align our individual goals and efforts with the overarching Mission, Vision, and Values of the company, fostering a culture of collaboration, mutual respect, and collective responsibility. This diverse approach ensures that we celebrate our achievements, support, and face challenges together as a community. We are dedicated to fostering growth, continuous improvement, and exploring new opportunities for development within our team and our company. By embracing this culture, we create an environment where everyone is motivated to contribute their best, knowing that their efforts are vital to our common success.
